CAREER SUMMARY

I am an expert mobile application developer. I have been developing applications with React Native and Flutter for 3 years. I have also worked on backend development using C#, Java Spring, Javafx. On the other hand I have deep knowledge and experience with SQL databases (MSSQL) and NoSQL databases (MongoDB).

I can develop mobile and web applications for you from scratch or contribute to your existing applications.

WORK EXPERIENCE

Full Stack Developer

The stage of knowing
that you don't know

2019 - Present

The second step of my career was TUBITAK company. My task in this institution, which has made successful works in Turkey, was to develop applications with Java and C#. I had the opportunity to improve myself on both frontend and backend. Apart from all these, I gained experience in areas such as project development and maintenance, analysis and testing. I am still working in this institution, which has contributed a lot to me in terms of both career and personal development.

Achievements:

It is necessary to work like ants to leave artifacts like giants.
I have gained a lot in the organization and benefited the organization a lot.
Here are the ones that come to my mind:

- Redis integration.
- Updating used systems.
- Growing and updating Wildfly servers.
- Detection and revision of non-modern designs on the front.
- Automating studies and manual configuration settings for a sustainable application infrastructure.

Technologies used:

Java C# Redis jQuery HTML/CSS Ms SQL Oracle

Software Developer

Startup
hub

2017 - 2019

While I was just graduating, I couldn't decide in which field to work, I met this company and developed applications in many fields. Desktop and website applications with C#, mobile applications with Flutter, website frontend designs with Reactjs and more. I had good times with good and bad sides

Achievements:

In this institution, I have undertaken very small and very different projects from big ones. The work I have done has made both the institution and me very happy. You know, it is very difficult for a recent graduate to choose a field. To tell the truth, I can still be undecided.

Technologies used:

Flutter React Nodejs Webpack HTML/CSS MySQL

SKILLS & TOOLS

Frontend

Flutter

React

JavaScript

Node.js

HTML/CSS/SASS/LESS

Backend

Java/Spring

C#/MVC

PHP

Others

DevOps Git Unit Testing
